

THINK SAFE

ACTISEPT PLUS

READY TO USE HAND DISINFECTION

Actisept Plus is a very effective hand disinfectant in, for example, healthcare, the food and veterinary sector and laboratories. Actisept Plus disinfects hands in 30 seconds and does not dry out the skin. It leaves no residues. Moreover, after use you will not suffer from sticky hands.

FIGHT AGAINST BACTERIA AND YEASTS

Actisept Plus fights bacteria and yeast on the human skin. The small spray bottle is handy to take with you where necessary. You can quickly disinfect hands: spray, dry on the air, done!

70% ISOPROPANOL

Actisept Plus is made on the basis of 70% isopropanol. This makes it very effective against bacteria and yeasts. Since the micro-organism is irreparably damaged, resistance is impossible. The isopropanol is diluted to 70% with demineralised water, leaving no residues.

APPLIED IN

- Food industry
- Catering industry
- Cosmetic sector
- Veterinary sector
- Laboratories
- Healthcare

BENEFITS

- Spray, let dry, done!
- Effective against bacteria and yeasts
- Ready in 30 seconds
- Resistance formation not possible

Use biocides safely and read the label and product information before using it.

THINK CLEAN

ADMISSION NUMBER: 14413 N, PT01

INSTRUCTIONS FOR GENERAL USE

Actisept Plus can be used immediately. The liquid does not need to be diluted.

For hygienic hand disinfection, first thoroughly wash hands and nails with soap and water. Make use of a nail brush. Dry the hands with disposable paper towels.

APPLICATION & DOSAGE

Apply 4 ml. of the disinfectant on the clean and dry hands. Massage the Actisept Plus well, where finger tips, nails and the folds between the fingers need to be fully moistened. Make sure that the hands remain moist throughout the entire contact time of 30 seconds. After the exposure time air dry your hands with spreaded fingers.

Dosage: 4 ml for both hands.

Minimum exposure time: 30 seconds.

PACKAGING FORMS

Veip article number	Description
131709	2 x 5 liters
131710	16 x 250 ml
